IMPORTANCE OF THE CONFERENCE:

Physiotherapy and Rehabilitation is considered one of the necessary basic modern sciences in the medical field. Its importance comes from its comprehensiveness and its overlap with other medical specialties in treating most diseases, musculoskeletal injuries and neurological diseases, in addition to its role in educating and supporting the community to prevent various problems and diseases. Today, the specialty of Physiotherapy has become a necessity. It is essential in society. Any house suffers from diseases, wounded, or injured person as a result of the unjust war on our beloved country, Syria.

Aims:

1. Recognizing the importance of physiotherapy, its comprehensiveness, and its overlap with other medical specialties
2. Providing new information and ideas for workers in this specialty, with the participation of academic lecturers from outside Syria.

Main Topics:

- The role of Physiotherapy in treatment of musculoskeletal diseases and injuries
- The role of Physiotherapy in treatment of neurological diseases and injuries
- The role of Physiotherapy in treatment of cardiorespiratory diseases
- The role of Physiotherapy in treatment of pediatric diseases
